

## DOOR SEALS

The Australian Standard AS/NZS 4815-2006 requires that door seals be inspected on a daily/weekly basis. Look for signs of leakage, cuts and cracks. Keeping the doorseal clean by wiping it with a damp cloth or alcohol wipe will greatly reduce the likelihood of leaks.

### BIO-CLEAN

Discount Autoclaves & Sterilisers have sourced a door seal to suit some Bio-Clean autoclaves. Note: a couple of dabs of silicone are required to adhere the door seal to the door.

*Solid doorseal for models with a turning handle*
